

The Quality Control Council Executive Committee launched an initiative in 2016 to establish a national training program across Canada.

NATIONAL TRAINING SOCIETY

The National Training Society (NTS) was organized as a legal entity to provide Natural Resources Canada certification courses in NDT and offer NDT workshops to support certification practical exams. Although outside of the NDT Industry National Training Fund eligible offerings, the NTS also offers Heat Treat Journeyman courses, Advanced Ultrasonic PCN certification courses in Phased Array and Time of Flight Diffraction, American Petroleum Institute exam prep courses in API 510, 570, and 653, and exam prep course towards National Board certification. Already an Authorized Examination Centre for written examinations in Edmonton, the NTS training centres are Recognized Training Organizations, and Edmonton, Hamilton, and Saint John are Recertification Exam Centres for UT, MT, and PT.

Please contact us at any time to discuss your training needs or go on our [website](#) for more details and to register for our programs. For those NDT Members eligible for NDT Industry National Training Fund reimbursement, please refer to the *Members Only* section of the QCC [website](#) for the forms to complete.

Qualified staff ready to assist you:

Come visit us any time at 10403 172 St NW - Suite 120 A in Edmonton and see what the Union is doing for you in supporting your training and development needs.

You can also call the NTS office at **780-488-3455 ext 1**, email us at nts@qccanada.com, or visit our [website](#) for more immediate assistance and direction.

Acknowledgement

The QCC NTS prides itself in being associated with the International Brotherhood of Boilermakers and United Association and thank these two organizations for their continuing belief and tremendous financial support to this training initiative. And, of course, we are always indebted to the QCC Members for the outstanding work they perform safely every day of the year!
